

On-line learning options: Antenatal and Postnatal

How to maintain affiliation/recognition as a ANSC GP

GPs participating on an ANSC program are expected to be familiar with ANSC guidelines and protocols and complete ongoing educational requirements. These requirements involve the accrual of at least **12 Cat 2 points in either antenatal and/or postnatal specific educational activities** over each RACGP triennium.

Completion of any of these activities is accepted as part of the ongoing educational requirements for a Recognised ANSC GP

Note: Courses may be subject to change and may no longer be available. Access to some of these websites may require log-in details and/or associated costs.
