Early detection saves lives.

For women aged 50-74, having a breast screen every 2 years is the best way to find breast cancer early.

Screening with BreastScreen NSW is for women with no symptoms. If you are experiencing symptoms such as a lump, nipple discharge or persistent new breast pain, please see your doctor without delay.

Women aged 40-49 and over 75 are also eligible to attend. However, speak to your doctor to see if it is a priority for you.

Call **13 20 50** to book you free breast screen or
book online via book.breastscreen.nsw.gov.au.
