3. Send the Data

Right click on the deidentified data set. Select *send to* then 'NBM PHN' then *OK*.

The screenshot shows a dashboard with several navigation icons: Collect, Hide Extracts, View Filter, Report, View Population, Dashboard, CAT4, and Cleansing CAT. Below the icons is a table of data sets. The table has columns for date/time, count, and name. The row with date '13/10/15 9:2' and name 'DEIDENTIFIED_DE...' is selected, and a context menu is open over it. The menu options are 'Delete Extract', 'Delete Summary File', and 'Send To'. The 'Send To' option is highlighted, and a sub-menu is open showing three options: 'patcat3', 'patcat2', and 'patcat'. To the right of the table, there are tabs for 'Demographics', 'Ethnicity', and 'Data Quality', and two checkboxes: 'Select All' and 'Show Total Counts'.
