

CAT Plus Can Help You With Digital Health!

NBMPHN is offering CAT Plus licences – including CAT4 and TopBar

CAT Plus is a data quality improvement and extraction tool that can enable practices to improve patient care by identifying at risk groups, optimise MBS and assist with data cleansing.

Contact the Practice Support team on 4708 8100 or www.nbmpnh.com.au/PenCat

NBMPHN and Cat Plus can assist you with:

- ✓ Streamlining your business process
- ✓ Improving early identification and prevention strategies for your patients
- ✓ Improving management of chronic disease
- ✓ Coding with clinical software
- ✓ Monitoring your Shared Health Summary uploads
- ✓ Upskilling staff
- ✓ Continuous quality improvement
- ✓ Accreditation, PIP and SIP reporting
- ✓ Increasing your clinical software knowledge
- ✓ Individual benchmark reports

In return you will need to:

- Submit automated monthly de-identified data from CAT Plus to assist with quality improvement.
- Actively participate in training.

CAT4 is compatible with Medical Director 3, Best Practice clinical, Genie clinical, Zedmed clinical, practiX clinical, Communicare, Medinet clinical, Medtech clinical and MMeX.

TopBar is compatible with:

Compatible Clinical Systems

- Best Practice
- Medical Director
- Zedmed (v26 and higher)

Compatible Billing Systems

- Best Practice Management
- Pracsoft
- Zedmed (v26 and higher)

The range of clinical Desktop Systems able to interoperate with the Pen CS Clinical Audit Tool is expanding all the time, additions will be made to this User Guide as this functionality becomes available. Not all reports/functions will be available for all clinical Desktop Systems as the level of data that can be extracted is not the same for all systems.
