HealthPathways

The online clinical tool for health professionals

nbm.communityhealthpathways.org

HealthPathways is a free, online clinical tool for local healthcare professionals to use during patient consultations.

HealthPathways is efficient, simple and quick to use. It helps you find the most effective treatment and management options using locally-developed clinical guidelines. You can also quickly find relevant local specialists and services for your patients.

Who can use HealthPathways?

HealthPathways is a decision support tool for **GPs and other healthcare professionals**. It is not intended to be used by patients or community members.

The screenshot shows the web interface of the Nepean Blue Mountains HealthPathways tool. At the top, there is a navigation bar with the Nepean Blue Mountains logo and a search bar labeled "Search HealthPathways". Below this, the "HealthPathways" logo is displayed. A sidebar menu on the left lists various clinical categories, each with a dropdown arrow: Home, About HealthPathways, Nepean Blue Mountains Localised Pathways, Acute Services, Allied Health, Child and Adolescent Health, End of Life, Investigations, Preventive Care and Public Health, Medical, Mental Health, Older Person's Health, Clinical Pharmacology, Public Health, Specific Populations, and Surgical. The main content area features a large graphic with the text "Nepean Blue Mountain HEALTHP" and a "Health Alert" section. The alert, dated the beginning of July, mentions new "Vaccine Storage Guidelines" and provides a link to the "Vaccine Storage" pathway for more information. It also includes contact details for the Nepean Blue Mountains Public Health Unit and the NBMPHN Practice Support team, with a phone number (02) 4708-8100.

HEALTHP

 **Health Alert**

New [Vaccine Storage Guidelines](#) were released at the beginning of July.

See the [Vaccine Storage](#) pathway for more information.

For further assistance, phone the [Nepean Blue Mountains Public Health Unit](#) or NBMPHN Practice Support team on (02) 4708-8100

How does it work?

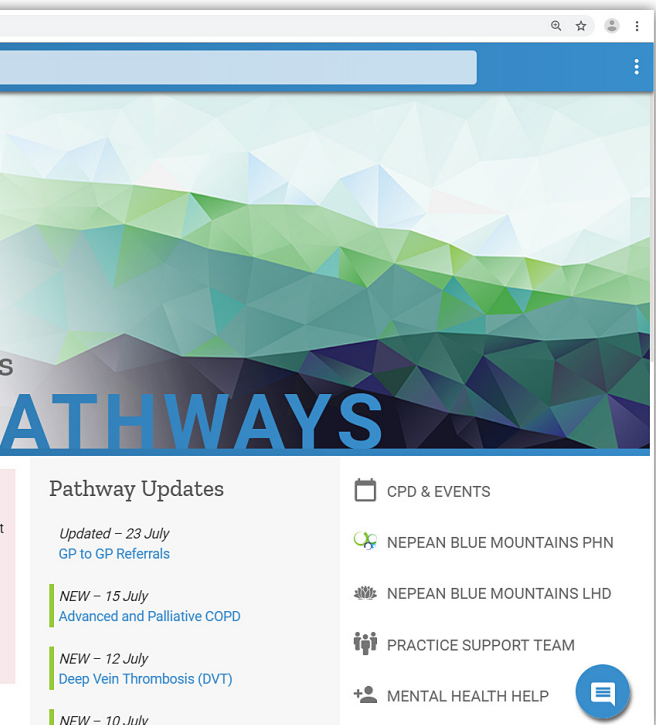

Through HealthPathways, a healthcare professional can:

- enter the patient's condition or suspected illness.
- access symptom outlines and management options.
- access information on how to refer patients to the most appropriate local services and specialists.

Can I suggest topics for HealthPathways?

Yes. Our HealthPathways team is keen to hear suggestions for new pathways from GPs, health service providers and hospital clinicians.
