

MyMedicare

What's it all about and why should I register?

MyMedicare is a program where you register with the general practice where you receive your healthcare.

When you register for MyMedicare you are formalising the relationship between you and your GP to support your ongoing health and wellbeing.

Does it cost to register?

MyMedicare is free to register.

Can I register with more than one general practice?

You can only be registered with one general practice at a time, but you can change your preferred practice or GP at any time.

If I register with a practice can I still go to another GP for treatment?

Registering with your preferred practice will not prevent you from accessing care from other general practices.

If you need an allied health referral as part of your chronic condition management, this needs to be done at the general practice you have registered with.
